PROFILE

I am José Eduardo Calvano Viola, a Systems Information Engineer and full-stack developer with over five years of experience in developing web and mobile applications. My professional career is grounded in formal university education, complemented by self-directed learning, a creative approach, and a constant pursuit of new challenges in an ever-evolving environment.

SKILLS

- React.js: 3+ years of experience in building robust and scalable web applications.
- React Native: 2+ years of experience in developing cross-platform mobile applications.
- TypeScript: 1+ year of experience using TypeScript for type-safe and scalable JavaScript applications.
- Agile Methodologies: 3+ years of experience working in agile environments, collaborating with multidisciplinary teams.
- Node.js: Experience in backend development with Node.js, including RESTful API creation.
- Testing: 1+ year of experience with unit testing (Jest and React Testing Library).
- UI/UX Design: Experience in designing intuitive and visually appealing user interfaces with a focus on user experience.
- Software Architecture: Strong knowledge of software development and architecture, with a focus on creating maintainable and scalable solutions.
- Frontend Best Practices: Expertise in frontend development, with a focus on clean code, performance optimization, and user-centered design.
- AWS: Basic knowledge in AWS, including S3 and Amplify.

EDUCATION

Information Systems Engineer

Universidad Tecnológica Nacional (U.T.N.)

Facultad Regional Resistencia - Argentina

2015 - 2021

e-learning platform

Udemy

Platzi

2018 - Currently

LANGUAGES

English (Intermediate)

Spanish (Native)

WORK EXPERIENCE

Bet Application Developer

Litebox   Mar 2022 - Currenly

- Designed and developed responsive web interfaces using HTML, CSS, and JavaScript, ensuring visually appealing and user-friendly websites.
- Created RESTful APIs to facilitate data exchange between the front-end and back-end systems.
- Designed, implemented, and maintained NoSQL databases (MongoDB) for data storage.
- Developed cross-platform applications for mobile and desktop using React and React Native, delivering seamless user experiences across different devices.
- Collaborated with Product Managers to identify and translate new requirements into clear, actionable user stories for the development team.
- Actively contributed to an agile framework by participating in daily stand-ups, sprint reviews, and retrospectives.
- Integrated AWS services, including uploading images to S3 and deploying websites to Amplify.
- Built and maintained a comprehensive testing suite using Jest and React Testing Library to ensure code quality and reliability.
- Worked closely with the design team, using Figma to transform design prototypes into functional, visually appealing user interfaces.

- Technologies used:
  - Front-End: React.js, React Native, Next.js
  - Testing: Jest, React Testing Library
  - Back-End: Node.js, MongoDB
  - AWS: S3, Amplify
  - UI/UX: Figma

Mobile Banking Developer

Banco de corrientes S.A   Feb 2020 - Feb 2022

- Identified both functional and non-functional requirements for applications.
- Developed and maintained mobile applications using React Native, ensuring performance and user experience.
- Designed intuitive and user-friendly interfaces using Adobe XD, with a focus on usability and aesthetic design.
- Implemented service modifications using Genexus for core banking integration.
- Led the preparation and continuous updating of comprehensive documentation throughout all stages of the project, ensuring clarity and consistency for all stakeholders.
- Collaborated in the integration of third-party libraries, including Vu Security, Onboarding with Facephi, and Prisma Medio de Pagos.

- Technologies used:
  - UI/UX: Adobe XD
  - Mobile Development: React Native, React Navigation, Redux
  - Integration: Genexus.

Web Developer

Freelance developer   Jan 2018 - Feb 2020

- Contributed to the design and development of responsive websites for various platforms, including mobile devices, tablets, and desktop computers. Utilized HTML5, CSS3, and JavaScript, with a focus on React.js. Implemented site enhancements to improve the user experience for multiple companies.

- Technologies used:
  - Front-End: React.js
